The 24-door switch has 2x1 Gigabit Ethernet SFP and 2x10 Gigabit Ethernet SFP + Uplinks; The 48-pore switch has 4x10 Gigabit Ethernet SFP + Uplinks to support any high bandwidth application. In addition, the PWR-C1-350WAC is not supported on multigigabit switches. We can help you reduce CAPEX. Accelerate your growth. All sets of software resource support advanced security and QoS based on MQC. [1] 3650 Multigigabit switches use different functions of power than the multigigabit models. Internet Group Management Protocol (IGMP) V1, V2, V3 Snooping for IPv4: Discovery Multicast Listener (MLD) V1 and V2 Snooping Provides fast junctions and multicast flow sheets and intensive video traffic limits bandwidth for only the applicants. Cisco Prime infrastructure provides daily provisioning 0 and continuing, continuous monitoring and maintenance, configuration models and device views and 360 Ā e
